Online Safety 4 Schools

Online Safety Workshops for Pupils – Staff – Parents

Child Exploitation to Peer-on-Peer Abuse to Online Reputation & Digital Tattoo

(Social Media – Gaming – Gaming Community & Direct Messaging Issues)

Online Safety Workshops for Schools (In Person & Virtual)

The infographic is divided into several sections. At the top left, it defines 'Online Competence when using Social Media, Online Games, Gaming Communities & Direct Messaging' with a sub-section 'Recognising, Understanding & Acting'. Below this are categories for 'Intended Competence' (Deliberate Appropriate Online Behaviour) and 'Unintended Competence' (Accidental Appropriate Online Behaviour). Further down, it lists 'Intended Incompetence' (Deliberate Inappropriate Online Behaviour) and 'Unintended Incompetence' (Accidental Inappropriate Online Behaviour). To the right, a box titled 'Online Competence' explains it as the ability to use a device with internet access, with knowledge and skill. A sub-section 'Who Decides?' asks 'Many Parents decide 'competency' by supplying their child with a device perhaps due to pressure (gifts) or mobile phone required as child now at school - NO CONSIDERATION IS GIVEN TO COMPETENCY'. A red cloud contains a list of risks: Ignoring Age Restrictions, Not Asking Permission, Not Taking Regular Breaks, Random Play, Random Requests, Random Notification, PMOYS, and Stranger Danger.

Online Safety within Safeguarding is certainly now very much 'standalone' and requires specific training / workshops for the Whole School, Staff, Students & Parents. Keeping Children Safe in Education (UK) 2021 (KCSIE), prioritises Online Safety Training for all schools, therefore schools should now consider Online Safety as a statutory requirement as well as 'Best Practice'. Online Safety workshops are of paramount importance

irrespective of country or location. All children, teenagers and young adults use devices, social media / apps / online games which can have a massive impact on their safety, future goals and targets (CyberVetting for Employment & Universities). Bespoke Online Safety training / workshops should be considered a safeguarding necessity as well as a legal priority pending any possible inspection by Schools Inspectorate .

Online Safety 4 Schools firmly believes that Online Safety is not a 'one size meets all' and Online Safety can vary, depending on schools' location, connectivity and internet availability Online Safety training can be tailored to your requirements. Training is designed for Teachers, Governors / Trustees, Parents / Carers and Pupils from years 1-13.
